# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Preface by Olaf Barthel . . . . .	1
1.2	Foreword of the Author . . . . .	2
1.2.1	Acknowledgments . . . . .	3
1.3	Language and Type Setting Conventions . . . . .	3
<b>2</b>	<b>Elementary Concepts</b>	<b>5</b>
2.1	Purpose of the dos.library . . . . .	5
2.2	The DosLibrary Object . . . . .	5
2.3	Booleans . . . . .	7
2.4	Pointers and BPTRs . . . . .	7
2.5	C Strings and BSTRs . . . . .	8
2.6	Elementary Conversion Functions . . . . .	9
2.6.1	Convert a String to a Number . . . . .	9
2.6.2	Print Formatted into a Buffer . . . . .	10
2.7	Paths . . . . .	12
2.8	Files . . . . .	12
2.9	Directories . . . . .	12
2.10	Locks . . . . .	12
2.11	Processes . . . . .	12
2.12	Handlers and File Systems . . . . .	12
2.13	The AmigaDOS Shell . . . . .	13
<b>3</b>	<b>Date and Time</b>	<b>15</b>
3.1	Elementary Time and Date Functions . . . . .	16
3.1.1	Obtaining the Time and Date . . . . .	16
3.1.2	Comparing two Times and Dates . . . . .	16
3.1.3	Delaying Program Execution . . . . .	16
3.2	Conversion into and from Strings . . . . .	17
3.2.1	Converting a Time and Date to a String . . . . .	18
3.2.2	Convert a String to a Date and Time . . . . .	19
<b>4</b>	<b>Paths and File Names</b>	<b>21</b>
4.1	Case Sensitivity and Character Encoding . . . . .	21
4.2	Maximum Path Length . . . . .	23
4.3	Devices, Volumes and Assigns . . . . .	23
4.3.1	Devices . . . . .	23
4.3.2	Volumes . . . . .	25
4.3.3	Assigns . . . . .	25
4.4	Relative and Absolute Paths . . . . .	26

4.5	Flat vs. Hierarchical File Systems . . . . .	27
4.6	Locating Files or Directories . . . . .	27
4.6.1	Open a File from an Overlong File Name . . . . .	28
<b>5</b>	<b>Files</b>	<b>31</b>
5.1	What are Files? . . . . .	31
5.2	Interactive vs. non-Interactive Files . . . . .	31
5.3	Opening and Closing Files . . . . .	32
5.3.1	Opening Files . . . . .	32
5.3.2	Closing Files . . . . .	33
5.4	Unbuffered Input and Output . . . . .	34
5.4.1	Reading Data . . . . .	34
5.4.2	Writing Data . . . . .	34
5.4.3	Adjusting the File Pointer . . . . .	35
5.4.4	Setting the Size of a File . . . . .	36
5.5	Interactive File and Handler Support . . . . .	36
5.5.1	Test whether a File Handle is Interactive . . . . .	37
5.5.2	Test whether a Path addresses a Handler or File System . . . . .	37
5.5.3	Test Interactive Files for Availability of Data . . . . .	38
5.5.4	Setting the Console Buffer Mode . . . . .	39
5.6	Buffered Input and Output . . . . .	40
5.6.1	Buffered Read from a File . . . . .	41
5.6.2	Buffered Write to a File . . . . .	41
5.6.3	Buffered Write to the Output Stream . . . . .	42
5.6.4	Adjusting the Buffer . . . . .	42
5.6.5	Synchronize the File to the Buffer . . . . .	43
5.6.6	Write a Character Buffered to a File . . . . .	43
5.6.7	Write a String Buffered to a File . . . . .	44
5.6.8	Write a String Buffered to the Output Stream . . . . .	44
5.6.9	Read a Character from a File . . . . .	44
5.6.10	Read a Line from a File . . . . .	45
5.6.11	Revert a Single Byte Read . . . . .	45
5.6.12	Macros for Buffered I/O . . . . .	45
5.7	Working with File Handles . . . . .	46
5.7.1	The FileHandle Structure . . . . .	46
5.7.2	String Streams . . . . .	47
5.7.3	Cloning File Handles . . . . .	48
5.7.4	An FSkip() Implementation . . . . .	49
5.7.5	An FGet() Implementation . . . . .	50
5.8	Formatted Output . . . . .	50
5.8.1	Print Formatted using C-Syntax to a File . . . . .	50
5.8.2	Print Formatted using C-Syntax to the Output Stream . . . . .	51
5.8.3	BCPL Style Formatted Print to a File . . . . .	51
5.9	Record Locking . . . . .	52
5.9.1	Locking a Region of a File . . . . .	53
5.9.2	Locking Multiple Regions of a File . . . . .	53
5.9.3	Unlocking a Region of a File . . . . .	54
5.9.4	Unlocking Multiple Records of a File . . . . .	54

<b>6</b>	<b>Locks</b>	<b>57</b>
6.1	Obtaining and Releasing Locks	57
6.1.1	Obtaining a Lock from a Path	58
6.1.2	Duplicating a Lock	58
6.1.3	Obtaining the Parent of an Object	59
6.1.4	Creating a Directory	59
6.1.5	Releasing a Lock	59
6.1.6	Changing the Type of a Lock or File Handle	60
6.1.7	Comparing two Locks	60
6.1.8	Compare two Locks for their Device	61
6.2	Locks and Files	62
6.2.1	Duplicate the Implicit Lock of a File	62
6.2.2	Obtaining the Directory a File is Located in	62
6.2.3	Opening a File from a Lock	63
6.3	Retrieve Information on the State of the Medium	64
6.4	The FileLock structure	66
<b>7</b>	<b>Working with Directories</b>	<b>69</b>
7.1	Examining Objects on File Systems	69
7.1.1	Retrieving Information on an Directory Entry	73
7.1.2	Retrieving Information from a File Handle	73
7.1.3	Scanning through a Directory Step by Step	74
7.1.4	Examine Multiple Entries at once	75
7.1.5	Aborting a Directory Scan	78
7.2	Modifying Directory Entries	79
7.2.1	Delete Objects on the File System	79
7.2.2	Rename or Relocate an Object	79
7.2.3	Set the File Comment	80
7.2.4	Setting Protection Bits	80
7.2.5	Set the Modification Date	81
7.2.6	Set User and Group ID	81
7.3	Working with Paths	81
7.3.1	Find the Path from a Lock	82
7.3.2	Find the Path from a File Handle	82
7.3.3	Append a Component to a Path	83
7.3.4	Find the Last Component of a Path	83
7.3.5	Find End of Next-to-Last Component in a Path	83
7.3.6	Extract a Component from a Path	84
7.4	Links	84
7.4.1	Creating Links	86
7.4.2	Resolving Soft Links	87
7.5	Notification Requests	90
7.5.1	Request Notification on File or Directory Changes	90
7.5.2	Canceling a Notification Request	93
<b>8</b>	<b>Administration of Volumes, Devices and Assigns</b>	<b>95</b>
8.1	The Device List and the Mountlist	100
8.1.1	Keywords defining the DosList structure	100
8.1.2	Keywords controlling the FileSysStartupMsg	100
8.1.3	Keywords controlling the Environment Vector	101
8.2	Finding Handler or File System Ports	108

8.2.1	Iterate through Devices Matching a Path . . . . .	108
8.2.2	Releasing DevProc Information . . . . .	111
8.2.3	Legacy Handler Port Access . . . . .	112
8.2.4	Obtaining the Current Console Handler . . . . .	112
8.2.5	Obtaining the Default File System . . . . .	113
8.3	Iterating and Accessing the Device List . . . . .	113
8.3.1	Gaining Access to the Device List . . . . .	113
8.3.2	Attempting Access to the Device List . . . . .	114
8.3.3	Release Access to the Device List . . . . .	115
8.3.4	Iterate through the Device List . . . . .	115
8.3.5	Find a Device List Entry by Name . . . . .	116
8.3.6	Accessing Mount Parameters . . . . .	117
8.4	Adding or Removing Entries to the Device List . . . . .	119
8.4.1	Adding an Entry to the Device List . . . . .	119
8.4.2	Removing an Entry from the Device List . . . . .	120
8.5	Creating and Deleting Device List Entries . . . . .	121
8.5.1	Creating a Device List Entry . . . . .	121
8.5.2	Releasing a Device List Entry . . . . .	122
8.6	Creating and Updating Assigns . . . . .	122
8.6.1	Create, Update or Remove an Assign . . . . .	123
8.6.2	Create or Update a Non-Binding Assign . . . . .	123
8.6.3	Create a Late Binding Assign . . . . .	124
8.6.4	Add a Directory to a Multi-Assign . . . . .	125
8.6.5	Remove a Directory from a Multi-Assign . . . . .	125
8.7	File System Support Functions . . . . .	126
8.7.1	Adjusting File System Buffers . . . . .	126
8.7.2	Change the Name of a Volume . . . . .	126
8.7.3	Initializing a File System . . . . .	127
8.7.4	Inhibiting a File System . . . . .	128
<b>9</b>	<b>Pattern Matching</b> . . . . .	<b>131</b>
9.1	Scanning Directories . . . . .	132
9.1.1	Starting a Directory Scan . . . . .	135
9.1.2	Continuing a Directory Scan . . . . .	136
9.1.3	Terminating a Directory Scan . . . . .	138
9.2	Matching Strings against Patterns . . . . .	138
9.2.1	Tokenizing a Case-Sensitive Pattern . . . . .	138
9.2.2	Tokenizing a Case-Insensitive Pattern . . . . .	139
9.2.3	Match a String against a Pattern . . . . .	139
9.2.4	Match a String against a Pattern ignoring Case . . . . .	140
<b>10</b>	<b>Processes</b> . . . . .	<b>141</b>
10.1	Creating and Terminating Processes . . . . .	147
10.1.1	Creating a New Process from a TagList . . . . .	147
10.1.2	Create a Process (Legacy) . . . . .	150
10.1.3	Terminating a Process . . . . .	151
10.2	Process Properties Accessor Functions . . . . .	152
10.2.1	Retrieve the Process Input File Handle . . . . .	152
10.2.2	Replace the Input File Handle . . . . .	152
10.2.3	Retrieve the Output File Handle . . . . .	152
10.2.4	Replace the Output File Handle . . . . .	153

10.2.5	Retrieve the Error File Handle . . . . .	153
10.2.6	Replace the Error File Handle . . . . .	153
10.2.7	Retrieve the Current Directory . . . . .	154
10.2.8	Replace the Current Directory . . . . .	154
10.2.9	Return the Error Code of the Previous Operation, List of Error Codes . . . . .	154
10.2.10	Setting IoErr . . . . .	159
10.2.11	Select the Console Handler . . . . .	159
10.2.12	Select the Default File System . . . . .	160
10.2.13	Retrieve the Lock to the Program Directory . . . . .	160
10.2.14	Set the Program Directory . . . . .	160
10.2.15	Retrieve Command Line Arguments . . . . .	161
10.2.16	Set the Command Line Arguments . . . . .	161
<b>11</b>	<b>Binary File Structure</b>	<b>163</b>
11.1	Conventions and Pseudo-Code . . . . .	164
11.2	Executable File Format . . . . .	165
11.2.1	HUNK_HEADER . . . . .	167
11.2.2	HUNK_CODE . . . . .	168
11.2.3	HUNK_DATA . . . . .	168
11.2.4	HUNK_BSS . . . . .	168
11.2.5	HUNK_RELOC32 . . . . .	169
11.2.6	HUNK_RELOC32SHORT . . . . .	169
11.2.7	HUNK_RELRELOC32 . . . . .	170
11.2.8	HUNK_NAME . . . . .	171
11.2.9	HUNK_SYMBOL . . . . .	171
11.2.10	HUNK_DEBUG . . . . .	172
11.2.11	HUNK_END . . . . .	173
11.3	The AmigaDOS Loader . . . . .	173
11.3.1	Loading an Executable . . . . .	173
11.3.2	Loading an Executable with Additional Parameters . . . . .	174
11.3.3	Loading an Executable through Call-Back Functions . . . . .	175
11.3.4	Unloading a Binary . . . . .	176
11.3.5	UnLoading a Binary through Call-Back Functions . . . . .	176
11.4	Overlays . . . . .	177
11.4.1	The Overlay File Format . . . . .	177
11.4.2	The Hierarchical Overlay Manager . . . . .	179
11.4.3	HUNK_OVERLAY . . . . .	180
11.4.4	HUNK_BREAK . . . . .	181
11.4.5	Loading an Overlaid Node . . . . .	181
11.4.6	Loading an Overlay Node through Call-Back Functions . . . . .	182
11.4.7	Unloading Overlay Nodes . . . . .	183
11.4.8	Unloading Overlay Binaries . . . . .	183
11.4.9	An Implementation of the Hierarchical Overlay Manager . . . . .	184
11.4.10	The MANX Overlay Manager . . . . .	188
11.5	Structures within Hunks . . . . .	191
11.5.1	The Version Cookie . . . . .	191
11.5.2	The Stack Cookie . . . . .	192
11.5.3	Extending the Stack Size from the Stack Cookie . . . . .	192
11.5.4	Runtime binding of BCPL programs . . . . .	193
11.6	Object File Format . . . . .	195
11.6.1	HUNK_UNIT . . . . .	196

11.6.2	HUNK_NAME . . . . .	196
11.6.3	HUNK_RELOC16 . . . . .	197
11.6.4	HUNK_RELOC8 . . . . .	198
11.6.5	HUNK_DRELOC32 . . . . .	198
11.6.6	HUNK_DRELOC16 . . . . .	199
11.6.7	HUNK_DRELOC8 . . . . .	199
11.6.8	HUNK_EXT . . . . .	199
11.7	Link Library File Format . . . . .	202
11.7.1	HUNK_LIB . . . . .	202
11.7.2	HUNK_INDEX . . . . .	204
<b>12</b>	<b>Direct Packet Communication</b>	<b>207</b>
12.1	Request an Action from a Handler and Wait for Reply . . . . .	207
12.2	Asynchronous Packet Interface . . . . .	208
12.2.1	The DosPacket Structure . . . . .	209
12.2.2	Send a Packet to a Handler Asynchronously . . . . .	210
12.2.3	Waiting for a Packet to Return . . . . .	211
12.2.4	Aborting a Packet . . . . .	211
12.3	Reply a Packet to its Sender . . . . .	211
<b>13</b>	<b>Handlers, Devices and File Systems</b>	<b>213</b>
13.1	The Handler Interface . . . . .	213
13.1.1	Locating a Handler from a Path . . . . .	213
13.1.2	Starting a Handler . . . . .	214
13.1.3	Handler Main Processing Loop . . . . .	216
13.1.4	Handler Shutdown . . . . .	219
13.2	The CON-Handler . . . . .	220
13.2.1	CON-Handler Path for Graphical Consoles . . . . .	220
13.2.2	CON-Handler Path for Serial Consoles . . . . .	222
13.2.3	CON-Handler Startup and Mount Parameters . . . . .	223
13.2.4	CON-Handler Buffer Modes . . . . .	224
13.3	The Port-Handler . . . . .	228
13.3.1	Port-Handler Path . . . . .	228
13.3.2	Port-Handler Startup and Mount Parameters . . . . .	229
13.4	The Queue-Handler . . . . .	230
13.4.1	Queue-Handler Path . . . . .	230
13.4.2	Queue-Handler Startup and Mount Parameters . . . . .	231
13.5	The RAM-Handler . . . . .	232
13.6	The Fast File System . . . . .	232
13.6.1	FFS Startup and Mount Parameters . . . . .	232
13.6.2	The Boot Block . . . . .	233
13.6.3	Disk Keys and Sectors . . . . .	235
13.6.4	The Root Block . . . . .	236
13.6.5	The User Directory Block . . . . .	238
13.6.6	The File Header Block . . . . .	241
13.6.7	The Soft and Hard Link Block . . . . .	243
13.6.8	The File Extension Block . . . . .	246
13.6.9	The Comment Block . . . . .	247
13.6.10	The Directory Cache Block . . . . .	247
13.6.11	The Data Block . . . . .	249
13.6.12	The Bitmap Block . . . . .	250

13.6.13	The Bitmap Extension Block . . . . .	252
13.6.14	The Deleted Block . . . . .	252

**14 Packet Documentation** **253**

14.1	Packets for File Interactions . . . . .	253
14.1.1	Opening a File for Shared Access . . . . .	254
14.1.2	Opening a File for Exclusive Access . . . . .	255
14.1.3	Opening or Creating a File for Shared Access . . . . .	256
14.1.4	Opening a File from a Lock . . . . .	256
14.1.5	Closing a File . . . . .	257
14.1.6	Reading from a File . . . . .	258
14.1.7	Writing to a File . . . . .	259
14.1.8	Adjusting the File Pointer . . . . .	259
14.1.9	Setting the File Size . . . . .	260
14.1.10	Locking a Record of a File . . . . .	261
14.1.11	Release a Record of a File . . . . .	262
14.2	Packets for Interacting with Locks . . . . .	262
14.2.1	Obtaining a Lock . . . . .	263
14.2.2	Duplicating a Lock . . . . .	264
14.2.3	Finding the Parent of a Lock . . . . .	264
14.2.4	Duplicating a Lock from a File Handle . . . . .	265
14.2.5	Finding the Parent Directory of a File Handle . . . . .	265
14.2.6	Creating a new Directory . . . . .	266
14.2.7	Comparing two Locks . . . . .	266
14.2.8	Changing the Mode of a Lock or a File Handle . . . . .	267
14.2.9	Releasing a Lock . . . . .	267
14.3	Packets for Examining Objects . . . . .	268
14.3.1	Examining a Locked Object . . . . .	268
14.3.2	Scanning Directory Contents . . . . .	269
14.3.3	Examining Multiple Entries at once . . . . .	270
14.3.4	Aborting a Directory Scan . . . . .	272
14.3.5	Examining from a File Handle . . . . .	273
14.4	Packets for Working with Links . . . . .	273
14.4.1	Creating Links . . . . .	274
14.4.2	Resolving a Soft Link . . . . .	275
14.5	Packets for Adjusting Metadata . . . . .	280
14.5.1	Renaming or Moving Objects . . . . .	280
14.5.2	Deleting an Object . . . . .	281
14.5.3	Changing the Protection Bits . . . . .	282
14.5.4	Setting the Comment to an Object . . . . .	283
14.5.5	Setting the Creation Date of an Object . . . . .	283
14.5.6	Setting the Owner of an Object . . . . .	284
14.6	Packets for Starting and Canceling Notification Requests . . . . .	285
14.6.1	Registering a Notification Request . . . . .	285
14.6.2	Canceling a Notification Request . . . . .	287
14.7	Packets Operating on Entire Volumes . . . . .	287
14.7.1	Determining the Currently Inserted Volume . . . . .	287
14.7.2	Retrieving Volume Information from a Lock . . . . .	288
14.7.3	Retrieving Information on the Currently Inserted Volume . . . . .	289
14.7.4	Relabeling a Volume . . . . .	290
14.7.5	Initializing a New File System . . . . .	290

14.7.6	Make a Copied Disk Unique . . . . .	291
14.7.7	Write Protecting a Volume . . . . .	292
14.8	Packets for Interactive Handlers . . . . .	292
14.8.1	Waiting for Input Becoming Available . . . . .	293
14.8.2	Setting the Line Buffer Mode . . . . .	293
14.8.3	Retrieving IORquest and Window Pointer from the Console . . . . .	294
14.8.4	Releasing Console Resources . . . . .	298
14.8.5	Stack a Line at the Top of the Output Buffer . . . . .	299
14.8.6	Queue a Line at the End of the Output Buffer . . . . .	299
14.8.7	Force Characters into the Input Buffer . . . . .	300
14.8.8	Drop all Stacked and Queued Lines in the Output Buffer . . . . .	301
14.8.9	Bring the Console Window to the Foreground . . . . .	301
14.8.10	Change the Target Port to Receive Break Signals . . . . .	302
14.9	Packets Controlling the Handler in Total . . . . .	303
14.9.1	Adjusting the File System Cache . . . . .	303
14.9.2	Inhibiting the File System . . . . .	303
14.9.3	Check if a Handler is a File System . . . . .	304
14.9.4	Write out all Pending Modifications . . . . .	305
14.9.5	Shutdown a Handler . . . . .	305
14.9.6	Do Nothing . . . . .	306
14.10	Handler Internal Packets . . . . .	307
14.10.1	Receive a Returning Read . . . . .	307
14.10.2	Receive a Returning Write . . . . .	307
14.10.3	Receive a Returning Timer Request . . . . .	307
14.11	Obsolete and Third-Party Packets . . . . .	308
<b>15</b>	<b>The AmigaDOS Shell</b> . . . . .	<b>309</b>
15.1	The Shell Syntax . . . . .	309
15.1.1	Input/Output Redirection . . . . .	309
15.1.2	Compound Commands and Binary Operators . . . . .	311
15.1.3	Unary Shell Operators . . . . .	311
15.1.4	Quoting and Escaping . . . . .	312
15.1.5	Variables and Variable Expansion . . . . .	314
15.1.6	Pre-defined Shell Variables, Configuring the Shell . . . . .	314
15.1.7	Backtick Expansion . . . . .	315
15.1.8	Alias Substitution . . . . .	316
